DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: FORKS CREEK HATCHERY IMPROVEMENTS (Pacific County)

Description of Proposal: The proposed project consists of two major elements:

1. Demolition of existing asphalt Adult collection/holding pond and replace with two/three new concrete raceway ponds, all within the existing footprint of the asphalt holding pond. New ponds replace and maintain current pond function, but facilitate easier pond cleaning of fish waste. No net gain in impervious surface area and new pond outlets will tie into existing pond effluent line/fish ladder.
2. Demolition of existing pollution abatement pond and construction of new larger abatement pond to improve existing treatment of fish waste collected throughout the fish rearing cycle. Construction of the new abatement pond will be completed within the existing hatchery footprint, and constructed on existing impervious surfaces.

Replacement of the asphalt holding pond with two/three new raceways and enlarging the existing pollution abatement facilities will result in improved water quality in Forks Creek.

Proponent/Applicant: Washington Department of Fish and Wildlife (WDFW)
